WHY CHOOSE FOR iTEXframe ?

Incredibly Versatile

iTEXframe light boxes look amazing! Offer incredible versatility and bring a space to life!

Graphics have perfect print quality and seamless fabric gains a depth that you can't achieve using other mediums.

Economical

iTEXframe LED lights use less power without compromising light quality.

iTEXframe can be reused by simply changing graphics.

Easy to ship and store

iTEXframe is flat-packed for easy and economical shipping. For storage, you simply dismantle the profile, fold the graphic and store easily in a very small space.

Environmentally friendly

iTEXframe profiles are made from lightweight recycled aluminium and can be reused and recycled. Lightboxes are flat packed for shipping, requiring less space and demanding less fuel. We print directly to fabric using water based dyes, eliminating waste and need for chemicals.

iTEXframe LED lighting uses 80% less power than conventional lighting.
